

Chemistry Newsletter No. 26

March 9, 2000

In the last issue, I mentioned that we have three alums at UHS (Kansas City Osteopathic School). I have since found out that we have one more, Veronika Galoyen ('97). Today, I got an e-mail from her, but she is now Veronika McDonald since she was married in the spring of 1999. Her e-mail address is below.

It just occurred to me that perhaps I should just assume that you will find such e-mail addresses below on the printed copy. We have been asked to omit them from the copy of this newsletter that appears on the www.rockhurst.edu site. If you want your e-mail address on the "web" we can do it, but I am told I need an explicit request for that.

March 16, 2000

Mike Riley ('96) called a little while ago with the news that upon graduation from Georgetown Medical School in May, he will be heading to St. Louis for a residency in Internal Medicine (Cardiology) at Barnes Hospital, Washington University, his first choice.

And I think I put into the last edition that Peter Daut ('95) will be heading for Louisiana State in New Orleans for Ophthalmology when he graduates from University of Arkansas Medical School this spring, also Peter's first choice.

And Tiffany Vetter, a current senior, came in to announce that she has been accepted to Emory University Medical School for next year. This is her first choice.

March 25, 2000

The other day I got an e-mail from Courtney Hardy ('96). He graduates from Loyola U. Med School this May and will begin his residency in Ob/Gyn at the University of Indiana, in Indianapolis. He says he hopes then to do a fellowship in gynecological oncology.

And yesterday David Malewski ('97) showed up on campus. I didn't have but a few minutes to visit with him, but he told me he is doing lab work for SmithKlein in St. Louis, (actually they were bought out by someone else, and I have forgotten the name!) and in fact has just finished his masters

degree at St. Louis U. in Biology. He worked with the same professor that Dr. George O'Connor did his Ph. D. with.

A few minutes ago, Steve Hodges ('92) dropped in. Steve is doing his residency in Emergency Medicine at Northwestern U. Medical School, Chicago. He says he still has a couple more years to go. He got his MD from Kansas.

March 28, 2000

A few minutes ago, Sirini Iyngar stopped into give me the news that he has been accepted into the University of Colorado Medical School. He is from the Denver area, hence he is quite happy with this news. Sirini will graduate this May.

April 4, 2000

Last evening Sokha Tang ('99) called to tell me that he is going to stay on at Dow for the summer. He is in Lake Jackson, TX on Co-op with Dow Chemical this semester. Regularly, he is doing Chem Engineering at Kansas State, and is co-op from there. They are sending him to Houston for a week to work with one of their suppliers. And then an e-mail came this morning saying that he "forgot to tell me something"! He got himself engaged last week to a young lady who will graduate from Drexel in Philadelphia this summer. The wedding is tentatively set for the summer of 2002.

And then I got an e-mail from Robert Thomas ('95). Robert will get his DO from Oklahoma State Osteopathic School in Tulsa next month. He has gotten a residency in Ob/Gyn at Northeastern Ohio University in Akron. Robert and Winifred have four youngsters.

Robert tells me that Erin Richey ('96) graduates from, Oklahoma U. Med School, and will be doing her residency at the University of Kentucky in Pediatrics.

April 7, 2000

This evening I got an e-mail from Kurt Johnson ('90). Kurt and his wife live in south Kansas City. He is running the lab for the Higginsville Habitation Center for the mentally handicapped. His new e-mail address is below.

April 13, 2000

A couple of folks have been in to say greetings this afternoon. First was Mike Guignon ('78) with a couple of daughters, one is looking over Rockhurst as a possible place to come next fall. Mike got his MD from St. Louis U, and is practicing in Bellville, IL

Then Sister Rosemary Flannigan just left the office. With all her energy, I am not sure why she has quit teaching. She is still in KC with the MidWest BioEthics Group, or something like that. If you see any KC television, she appears on there in commercials for St. Joseph's Hospital (or should I call it "Health Center"?). No, she wasn't science, but I thought many of you would remember her.

Every so often I get a nice e-mail complete with pictures in color from Mike Hitchcock ('60). Mike and Joan live alternately between Palm Desert, CA and a "hideaway" in the mountains of Arizona, depending on the weather.

April 18, 2000

Mike taught high school chemistry for a number of years, and is now retired in this fashion.

Yesterday afternoon I got a long e-mail from Paul Keenan ('66). Paul graduated from here, and later was on the faculty here for a while, along in the '70s as I recall. Currently, he is a priest of the New York Archdiocese, living in Manhattan. He runs a couple of radio shows, and has written several books, articles, etc., and all kinds of stuff. His e-mail is below. I guess I should mention also that he even has his own "home page" called www.fatherpaul.com complete with picture!

An e-mail from Richard Heck ('97) tells me he is doing a rotation in family medicine with a U. Tenn. alum in Forrest City Arkansas and just loving it. It sounds like he has been convinced that this will be his area of specialty. He has been chosen for next year to teach a group in the class behind him because his attendings have given him such high recommendations. His e-mail address is below.

And another e-mail from Bill Dickason ('65). Bill has retired from Eastman Chemical in Batesville AR, and moved to Asheville, NC. He occasionally does a little consulting in custom synthesis.

April 25, 2000

On my way to lunch this morning, Chuck Moylan ('79) came up to say hello. He was here with his son Patrick a jun-

ior at O'Hara High. His class was visiting the University for the day. Chuck is a pediatrician here in KC.

And while I am at this, I got an e-mail over the week-end from Elisa (Kiehl) Vinyard ('96). Elisa graduates from UHS with her DO degree next month. She begins her residency in Family Practice at the Medical Center of Independence July 1. She married Tom Vinyard after her first year at the Osteopathic Medical School. Afterwards, she hopes to join her father in practice in Maysville, MO. E-mail is below.

And I also got a note (e-mail) from Pete Skidmore ('90) with his new e-mail addresses (below). Pete is still in the army and graduates from his Infectious Diseases fellowship in June, and then becomes faculty of Brooke Army Medical Center (San Antonio, TX) in Internal Medicine and Infectious Diseases for the next year, and then (summer 2001) he figures he will be moving on.

I got a short e-mail from Al Hersel ('90). He didn't say much other than he is still alive and kicking. Maybe more later, I hope. His e-mail address is below.

May 3, 2000

Last evening, I was about to leave when Kathy Owen ('99) showed up. She is finishing her first year at UHS (Osteopathic here in KC). She said she was really looking for a quiet place to study since they are going to have finals in a week or so. Her email address is below.

This morning, I got a very nice note from John Brems ('77). After a stint at La Jolla and teaching St. Louis U Medical school (also where he got his MD), John has been at Loyola Chicago Medical School. He is an expert in liver transplants, and is now looking at trying to develop an artificial liver.

I got a note from Paul Sullivan's (x'93) mother the other day, and among other things, she mentioned that Paul has accepted a Research Fellowship in Pharmacology and Toxicology and KU in Lawrence. Paul got his DVM from K-State and has been working in California for several years.

I have been reminded that I must put the following in here, too. Last Sunday, at the Honors and Awards Convocation I was given the Pro Meritis Award from the University. I should also add that this newsletter was cited as a big reason for the award. I really do appreciate it. And especially do I appreciate all the nice notes I have received from so many alums. THANK YOU ALL!

Several old friends showed up for the ceremony, and for them, too, I am very grateful. John and Sue (Rowan) Malinee and Jim and Mimi Bourquin, (all about '75). Both Jim and John are in business here in KC.

Mark Angles ('85) was there, too. Mark is an internist here in KC. He got his MD from Kansas U.

And Kevin Gratton ('63) came. Kevin has been teaching Chemistry for quite some time at Johnson County Community College. He got his Ph. D. at Kansas U. He and Mary Kay live in Olathe.

And then Bill Oulvey, S. J., ('71) also came for the occasion. Bill is in charge of recruiting new members for our Jesuit Order. He works out of our Provincial Offices in St. Louis. Bill's e-mail address is below

And yesterday came a note from Mike Hitchcock ('60) that he and Joan have gone to the "hideaway" at Alpine, AZ for the summer.

May 10, 2000

I was talking to Tom Audley a few minutes ago, and he tells me that his daughter Mary (Audley) Dawdy has gotten a promotion this week to Technical Liaison at CCP (what used to be a part of Cook Paint. They were bought by the French company that is "Total" petroleum.

May 13, 2000

This afternoon is the Baccalaureate Mass, and tomorrow is graduation. Yesterday Augusto (Gus) de la Piedra ('71) came in and we had a real nice visit. He runs a business of selling industrial instruments in Lima, Peru. He and his wife have four children and one grand child. His e-mail address is below.

While Gus was in the office, John Nguyen ('97) came in. John is finishing his third year at St. Louis U. Medical School.

May 16, 2000

After the Baccalaureate Mass Saturday afternoon, we had a reception in the quadrangle. Among some alumni there, Eddy Hart ('97) was there, since his sister was graduating. Eddy and Sara live in Washington, DC and both are going to school at an extension of Johns Hopkins there.

And Vince ('60) and Marianne Koehler were there for the graduation of their youngest, John.

And I saw Dan ('90) and Cindy (Kennedy) Mitchell were

there with their very young son, Tommy. Dan is an anesthesiologist here in KC, having finished his fellowship at Iowa a year or so ago.

Graduation I guess is the time to be sure I talk about what our graduates will be doing next year, so here goes. All the folks are from this year's graduating class unless I say otherwise.

The largest single group are the pre-medical scholars going to St. Louis University Medical School. These are Sarah Wisch, Chris Bauer, Garry Gagnon, Steve Hunter, Stephanie Benson, Gregg Hellwig, Josh Evans, and Scott Troy. Rob Borusheski ('99) and Julie (Postel) Weiner ('00) will be going to the University of Health Sciences College of Osteopathic Medicine (the old Kansas City Osteopathic School). Rob has been working at the Duschene Clinic in Kansas City Kansas this year.

Sirini Iyengar and Christine Jelinek are both going to attend the University of Colorado Medical School in Denver. Both are from the Denver area.

Piper Calasanti will be going to Georgetown Medical School in Washington, DC next year.

Tiffany Vetter is going to Emory University Medical School in Atlanta, GA.

Robyn Colvin is going to the University of Missouri – Columbia Medical School.

Now for the Graduate School folks, all with a teaching assistantship:

Alex Bates will go to Notre Dame University for Chemistry – probably Organic.

Joe Valain will go to Kansas U for Chemistry, organic too, I think.

Jason Moran will go to St. Louis U. for Biochemistry, and I am not sure, but maybe with a couple of other areas thrown in for good measure.

Tom O'Toole will take his Chemistry degree to Law School at St. Louis U.

And I have just heard that Chris McAboy ('99) has been attending Marquette Dental School for the last year.

May 25, 2000

I was talking to John Emo ('68) last evening. He and Karrie moved to Elko NV last summer. He joined a practice there (Ob/Gyn). John got his MD from St. Louis U. Medical School. His e-mail address is below

May 31, 2000

This past week-end I was doing some traveling. First, I was in Washington at Georgetown U Medical School graduation. Mike Riley ('96) graduated. All went well. As I noted above, Mike will go to Washington U. Barnes hospital, St. Louis for his residency first in internal medicine and then cardiology.

Then it was off to Los Angeles for Bob Kanard's (special '96) wedding to Lisa Itamura. Bob just graduated St. Louis U. Medical School a couple of weeks ago. He will be going to the University of Louisville Medical Center for his residency in surgery. Bob (senior) ('59) and Mary Catherine were there, of course. He graduated from St. Louis Med school, also, as did young Bob's older sister who is now at Mayo in Rochester, Minn.

June 2, 2000

A couple of days ago, I got an e-mail from Lindy Huntington at KU (Lawrence). She is participating in a research project (Summer Research Experience for Undergraduates in Biomolecular Sciences) for the summer. She will be a senior this fall, and so not yet an alum, but I thought it good to tell you what some of our current "bright lights" are doing for the summer.

Then there was the great e-mail I got from Paul Winkeler ('97) yesterday. Paul has been teaching at Rockhurst High this past year and is "on cloud nine"! Besides the freshman General Science and some chemistry, he has been coaching the swim team and assistant coach of baseball.

And today I got the notice that Adam Booser ('96) has gotten his MD from Kansas U, and will do his residency at Johns Hopkins in Ob/Gyn.

And a couple of days ago, I got a note from Dean Chinnery ('79), not a science major but a pretty good guy anyway! He and Cindy live in the Seattle area. They adopted a little boy a couple of years ago. He works for Cummins.

June 12, 2000

I did get more from Al Hersel ('90) as mentioned above. He went on and got his under-grad work in chemical engineering at Rolla and then worked in Houston for a while, and finally decided to get his Ph.D. in Chem Engineering. So, now he is a grad student at Yale, teaching part time and thinking of becoming a college professor!!

And a note came from Tim Schmitt ('95) yesterday. Tim is doing his residency in surgery and eventually cardiac surgery at Mayo Clinic in Jacksonville, FL. He got his MD from Creighton a year ago. He and Jean have a one and a half year old boy. His e-mail is below.

June 15, 2000

Brett Higbie ('99) stopped by this afternoon. She is working for Aventis Pharmaceutical here in KC – it is the most recent reincarnation of Hoest-Marion Roussell (or however you spell it, the more recent successor of Marion Labs).

And as I was leaving the office this afternoon, Mike Wachter ('66) walked in. Mike is with Johnson and Johnson and has been since he finished his post-doc at Kansas U. He got his Ph.D. at Vanderbilt. He claims to be a grandfather, but he certainly doesn't look like one!

June 21, 2000

Yesterday afternoon, Vincent Nguyen called from Toledo, to say Hi! He is working (customer consulting) for Informix in Lenexa, KS, the software company. And today he sent me his e-mail address, see below.

Then, last week-end I was in St. Louis for a couple of weddings. The first was for Steve Hunter ('00) on Friday evening (June 16), in Warrenton, MO (just west of St. L.). He married Natalie Hammond ('00, Elementary Education). And at that affair there were several of the Rockhurst folks.

Richard Heck ('97), and his wife, Belinda and 2-year-old Cassie came from Memphis, TN. Richard is beginning his last year at the U. of Tennessee Med School in Memphis. He thinks he will be going into Family Practice.

Sokha Tang ('99) was there, too. Sokha is attending Kansas State to get his degree in Chemical Engineering, but at the present he is working for Dow Chemical in Lake Jackson, TX on co-op, and doing quite well.

Another one getting his degree in Chemical Engineering is Jason Gordon ('00). Jason got his chemistry degree from Rockhurst University this spring, and will get his engineering degree from Iowa State, Ames, in another year.

Kim Schmidt ('98) and Mike Twyman ('98) got married in the St. Louis Cathedral on Saturday morning (June 17). Both of them have just taken the USMLE part I (used to be called the National Boards). That is, they have just finished second year Medical School at St. Louis University. They

were both pre-Medical Scholars.

And then there were several other pre-Medical Scholars there. Mary Fournier ('98) and Alicia Tonnes ('98) were both in the wedding party. They, too, are Scholars and have just finished second year Medical School at St. Louis U.

Tuong Nguyen ('98) showed up, too. Tuong is another Pre-Med Scholar in that same class. He has just gotten back from a few days in California where, among other things, he competed in a marathon. He will be taking the "Board" exam later this month.

Gabe Moore (MT '98) was also in the wedding party. Gabe has just finished his masters degree at the University of Illinois and has just moved to New York to take a job with IBM.

I must not forget Mike's step-father, Nick Verde ('58). I remember having him in class one of my first years here. Nick got his MD from St. Louis U also, and he is now a radiologist in St. Louis.

June 27, 2000

Here I am getting back to this, so also at Kim's and Mike's wedding were Cathy Hasenstab (OT '00), Angie Heaton (PT '00) and Robbie Fennewald ('98). They are all living in St. Louis (home for the first two). Angie says she has gotten a job, and Cathy is relaxing for a while before she starts looking. Robbie is working for an instrument company, and rooming with Mark Costaldi ('98). Mark was back in Arkansas for a while. Robbie says he is taking a year out of med school (St. Louis U.) to study Pathology before he goes into third year clinical rotations. Mark is also a Pre-Med Scholar.

And then a few days ago, I got an e-mail from Marian Eiberger Dryburgh ('95) announcing the birth of a son on June 2. Marian lives here in Kansas City. Her e-mail address is below.

A couple of days ago Molly McCaffery Gallagher (x74) popped in for a nice visit. Molly and John have several children (4 or 5, if I remember right), now almost all grown. They live in Lombard, IL, outside of Chicago. Her e-mail is below.

Molly was hardly gone when Josh Elliott ('98) came in. Josh has also just finished second year at St. Louis U. Med School, as well as the USMLE exam. Like the rest, he is sure glad that much is over.

And last evening I saw Joan Fitzgerald ('98) another Pre-

Med Scholar from that same class at St. Louis U. She was with her fiancé, Eric Giovanni, who is studying social work. They will be getting married this Saturday, July 1, here in KC.

June 28, 2000

This morning Tim Stoppelman ('00) stopped in to tell me he is heading for Pittsburgh, KS to work on a master's degree in Ecology. Tim had thought about becoming a physician, and did get accepted to medical school, but like many before him, he thinks the basic sciences look so much better.

And earlier this week, I got the second set (!) of pictures from Jason ('98) and Brenda Menges of their new daughter Sydney Christine (6/17) including baptism pictures from last week end. They live in Wichita, KS.

June 29, 2000

Today I had a nice visit with John Kedora ('98). John is home for a few days before starting third year medical school at St. Louis U. He is also one of our pre-Medical Scholars there.

July 5, 2000

This morning I got an e-mail from Laura (Rowland) Moore ('93). She and husband Sean are in the Air Force and are being transferred to Scott AFB across the river from St. Louis. Laura got her MD from Creighton Med School, and has been doing her residence in Gulfport, MS. I don't have a new e-mail address.

July 10, 2000

Last Saturday we baptized Dan and Cindy (Kennedy) Mitchell's ('90) number 3 (second son). They have gotten a house out in Stillwell, KS. He practices in Johnson County.

Some day, maybe, I'll get organized, but I have been going through a couple of stacks of things and I found several Christmas letters that I must have put aside to make note of. And I guess they got buried. So now I make up for my messiness.

The one on top is from Chris ('87) and Lucia Rooney. Chris has a dental practice in Overland Park, and Lucia is keeping busy with 6-year old Abbie and playing soccer.

And in the same pile was a long letter from Reva Servoss with greetings from the Wasatch Mountains. Reva and Bill moved to Salt Lake City nearly two years ago now to be near

daughter and grandchildren. Reva cannot keep out of the classroom completely, so she is teaching chemistry, and math to some special youngsters who need extra attention. I guess Reva really hasn't changed!

And another letter in the group was from another former teacher here, Steve Lawrence. ('89-'92, as he reminded me). Steve has been at Saginaw Valley State University in Michigan since he left here. Among other things he was awarded the Warrick Award for excellence in Research. He says that Dr. Warrick (retired from Dow Chemical) is the inventor of Silly Putty! The research was work that he started here with Rick Edgington. Steve also received the Saginaw excellence in teaching award a couple of years ago.

July 15, 2000

Let me put a brief note in here: I just found out yesterday that the Homecoming-Alumni Reunion will be the week-end of October 20-22. Keep it in mind. With some luck, much of the mud piles (also known as construction) will be close to finished by that time! I don't know yet what special events are planned, but you should be getting notices in plenty of time.

July 19, 2000

I was talking to Anita Salem (Math Dept.) this morning. She tells me Laura ('94) got her Ph. D. from Iowa U. this spring and is now doing a post-doc at UMKC. She is working in molecular genetics.

August 11, 2000

It seems that I am always playing "catch-up". So here goes again. A couple of weeks ago, Mac Geschwind ('63) came to KC and I had real nice visit with him. Mac started out a chemistry major, but wound up in business and eventually was some kind of president with Southwestern Bell. He and Elaine have now retired to Reno, NV.

And then I got a note telling me that Barb (Juenemann) Marak has finished her residency in anesthesiology at Mayo in Rochester, MN, and has moved to Salina, KS. If my memory is any good she got her MD from KU.

A few days ago I got an e-mail from Bill Grattan ('60). Bill got his PhD from Wayne State, I believe, and has been in a "think tank" or whatever in the Washington, DC area ever since. But the sad part is that he has had leukemia for several years, what I will call a mild form, but this spring it took a

turn for the worse, and he has had several rounds of "chemo". Right now, he has been accepted for an experimental treatment with bone marrow stem cells with NIH and Georgetown Hospital.

And speaking of Gratton, I spoke with his cousin Kevin ('63) this evening. Kevin got his PhD from KU and has been teaching at Johnson County Community College for many, many years. In fact, he recently got their Distinguished Service Award for the 7th time! In addition, he has received the Burlington-Northern Teaching award twice in the last few years!

An e-mail from Chris Bauer ('00) says he is getting ready for med school (St. Louis U) and sending his new e-mail address (below). He is living at home with his parents in Chesterfield, MO.

A note (e-mail) from Buck ('92) and Lisa Haney tell me that they are expecting in another 6 months or so. They are planning to build or buy a house in the south part of Kansas City. They are both chemists at Quintiles (one of the most recent reincarnations of what was originally Marion Labs).

A few days ago, I got a short e-mail from Paul Sullivan (x'93) from Lawrence, KS announcing his arrival and starting in pharmacology and toxicology looking toward a Ph.D. He received the Self Fellowship. His e-mail address is below.

And about the same time, I got an e-mail from Atlanta. Tiffany Vetter ('00). She is there attending Emory University Medical School. E-mail address is below.

And Sara Wisch is "settling in" in St. Louis going to St. Louis U. Med School. Her e-mail address is below.

Jason Menges ('98) has a new e-mail address, below.

August 16, 2000

A short note today from Wilfred Declercq ('56) gives me his new e-mail address. (see below) He is retired and lives in Tucson, AZ, where he has been since '98.

August 19, 2000

Yesterday I saw Mike Tull ('00) on campus. He was just passing through KC on his way back to Tucson. He is working in a hospital lab and going to school at Arizona State.

And then the new School of Professional Studies (the reincarnated night school of old) was having a reception or something for the new students, and there was Jim Millard ('89). His is teaching some computer stuff to these folks. His

regular job is and has been as a computer guru.

Today the new freshmen arrived and we shall see what we shall see, I guess. How many do we have? I really don't know, but I do know that the PT and OT are not what they were a few years back, but that seems to be true around the country, judging by some of the literature I get from other schools.

Last evening I was walking across the newly refurbished campus when I heard my name being called in the darkness. It was Bob Moser ('97). He was in town for just the day and heading back to Omaha for school next week. He is in the Pharm. D. program and the University of Nebraska Medical School. He says he has two more years, and then a year of internship. He seems to be surviving very well.

August 22, 2000

I got a short e-mail from Alex Bates ('00). He is beginning graduate work in Chemistry at Notre Dame. His e-mail address is below.

And I got a new e-mail address for Mike Riley ('96). (see below) He is doing his residency in Internal Medicine (Cardiology) at Barnes Hospital, Washington University in St. Louis.

August 24, 2000

A short e-mail from Scott Troy ('00) (e-mail address below) says he has a lot of muscles, nerves, etc. to learn – well that's the way 1st year med school starts out. He is at St. Louis U. and also living with Garry Gagnon ('00).

The other day I got a nice e-mail note from Mike Schmitt ('97). Mike is at Notre Dame getting his Ph. D. in Organic Chemistry. So far things are going well, courses, exams, orals all passed in great style. Now the research etc. And so far one paper published, and another in press – Great. He figures a couple of more years and then probably a post-doc. New e-mail address is below.

September 4, 2000

This evening I got a nice e-mail from Jason Gordon ('00) at Iowa State. He has this one more year there to finish his Chem Engineering degree, and then grad school. He seems to be thinking about some kind of chem engineering connected with the biological aspects.

September 6, 2000

I got an e-mail this morning from Bill Grattan ('60). As mentioned above, he has had leukemia for some time. He is now getting chemotherapy at Georgetown Hospital in conjunction with an NIH protocol, with a view to a bone marrow transplant. Right now, the chemo is doing a great job and so there will be another course starting today, with evaluations by the end of the month.

September 11, 2000

This afternoon, John Nguyen ('97) dropped by. John is in his last year of medical school at St. Louis U. He is thinking seriously about a residency in ophthalmology, and would like to stay around St. Louis or Kansas City. He says his classmate Amie Caselman is seriously considering pediatrics.

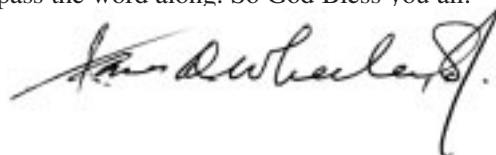

The Rockhurst University home page is up and running on the web as <http://www.rockhurst.edu> and there is a sequence on the Chemistry Dept. Just follow "Academic Programs", "Arts and Sciences", "Bachelor of Science" and so on. And included in that are a couple of the last versions of this newsletter, and this one will probably be there in the near future.

One other thing on this point: Thus far the e-mail addresses (below) are not included on the web. A couple of folks have asked that their e-mail not be listed on the web, others have asked that their's be listed. So for the time being, the list only occurs on this printed version. Let me know what you think.

.....
One more point is that there are several other folks less connected with the Chemistry Department and the Science Division who have asked to be included in this mailing list. So you may see a few of them mentioned from time to time. They are all good friends and Rockhurst alums.

There are a couple of things coming up that I want to mention. First is the Alumni Week-end October 20-22. The dedication of the new Bell Tower and related campus revisions will be Tuesday afternoon, October 17th.

I invite you to let me know what goes on with you and I'll pass the word along. So God Bless you all.

James D. Wheeler, S. J
